2012 Mitsubishi Model Line Up

Drive More.

With so many car companies churning out so many parody products, we at Mitsubishi choose to be different. Of course, we build our vehicles for a different breed of driver, too. It's clear to us that people who want distinctive styling and the latest technology see past the procession of bland imitations. A driver who yearns for, say, the mastery of super all-wheel control, isn't interested in anything from a parody lineup.

At Mitsubishi, we believe that every vehicle we make should stand for something. Something more than expected. And that's why, from the breathtaking Lancer Evolution to the accommodating Outlander Sport, every Mitsubishi is built for those who take pride in what they drive, and refuse to drive more of the same.
